ABSTRACTED-PUB-NO: BE 866274A

BASIC-ABSTRACT:

Water-permeable sheet material suitable for making tea-bags is impregnated with 0.03 to 0.5 mg/cm² of an acid substance so that it has an acid reaction on contact with water. The tea bag made from it contains 2-25 mg acid substance per gm of tea. Specifically, the tea bags are mfd. by soaking the paper in an aq. soln. of an edible acid substance and then dried.

The acid substance improves the colour of the tea obtd. Impregnating the sheet provides a satisfactory means of incorporating in the tea the very small amt. of acid substance required.

TI Flavor-preserving **tea bag** coating

AB Com. **tea bag** paper is coated with a film composed of one or more edible, water-sol. high-mol.-wt. compd., such as starch and its derivs., high-amylose starch, CM-starch, CM-cellulose, Na alginate, **gelatin**, xanthan gum, and Na polyacrylate; the product seals the contents air tight and becomes porous when dipped in hot water. Thus, high-amylose starch (70% amylose [9005-82-7]) 100, glycerol 10, and water 300 parts were autoclaved at 120.degree., coated on com. **tea bag** paper, and dried at 60.degree.. The coated paper had an amylose layer 13 .mu. thick, and was made into **tea bags** which were filled with black tea and held at 30.degree. and 90% relative humidity for 10 days. The aroma, flavor, and taste of the tea did not change, whereas controls in conventional **tea bags** had extensive off-flavor.

ABSTRACTED-PUB-NO: CN 1356132A

BASIC-ABSTRACT:

NOVELTY - A Chinese-medicinal tea bag (I) is prepared from 8 Chinese-medicinal materials e.g. belamcanda rhizome, trichosanthes root, ophiopogon root and prunella spike is new.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for the preparation of (I) through baking, crushing, sieving, breaking, sterilizing and packing.

USE - The tea is used for treating chronic pharyngitis and vocal fold disease.

ADVANTAGE - Advantages include sure curative effect, and no toxic side-effects.

INT-CL (IPC): A23 F 3/14; A61 K 35/78

ABSTRACTED-PUB-NO: CN 1114569A

BASIC-ABSTRACT:

A Longqian health-care tea is prepared in the form of tea bags is made by using green tea as the main material and using the Chinese medicines of cassia seed, hawthorn fruit, chrysanthemum flower, uncaria stem with hooks, persimmon leaf, lotus leaf, fleece-flower root, dried ripe fruit of Grosvenor Momordica and pseudostellaria root as the auxiliary materials. The method comprises dividing the materials into mother materials, minor materials and tea material, preparing them and mixing them. The tea does not only retains the medicinal effects of the original Chinese medicines but also has the characteristics of a tea bag, such as small volume, light in weight, easy to drink and to absorb. The tea can treat hypertension because it reduces blood sugar and weight.
